## CONVEX MIRRORS – Hi-vis Round

Tough shatter proof polycarbonate mirror lens with durable moulded fibreglass backing. The outer rim of the lens which is moulded as one piece with the backing panel, has the added advantage of being highly visible at night or in low light, due to the premium grade class 1 reflective surface. Suitable for indoor or outdoor applications to increase visibility and eliminate blind corners. Supplied with both wall and post mount brackets to suit 60mm diameter posts.

## CONVEX MIRRORS – Hi-vis Roundtangular

The Hi-vis Roundtangular mirror has all the same structural features as the round model above. The elongated shape allows a wider field of view while allowing a more compact shape. Also suitable for indoor or outdoor use and is supplied with mounting brackets. Supplied with both wall and post mount brackets to suit 60mm diameter posts. The one-piece outer rim with class 1 reflective is moulded into the backing panel.

## TELESCOPIC MOUNTING ARM

For use with polycarbonate mirrors.

There often situations where wall mount mirrors need an extended stand-off mount to clear obstacles or see around doorways or corners etc. This telescopic extension arm allows the mirror to be mounted to walls or columns and adjusted from 400 to 600mm of stand-off. Alternatively due to the design of the base plate it can be bolted to most types of pallet racking without the need to drill holes, thereby not compromising the structural integrity of the racking.

Constructed from mild steel and zinc plated for indoor or outdoor use. Wall fixings NOT included.
