

## Permanent 316 Stainless Steel Bollards - Extra Large

These stainless steel in ground bollards are used for heavy duty applications such as road separation from pedestrians.

The recommended diameter used on major projects i.e. (City of Perth main railway station entrance) is 168mm.

We can supply them with a fully welded, flat cap or with a separate spring cap if you want to concrete fill the bollard.

TO ORDER:  
Model IB168SS – 316/900IG
