

Stainless Steel Removable Bollard - In Ground

Our Stainless Steel Bollards help protect your property with the added flexibility of being able to be removed for complete access. Our Stainless steel removable bollards have Street Appeal when you want to make a statement! This in-ground model has a sleeve that is concreted into the ground with the bollard post able to slot into it and then padlocked in place over the locking bar. There is a Stainless steel cap provided to cover the hole when the bollard is removed.
